Wacom Tablet: Configuring Preferences

This document will guide you through the process of configuring a Wacom tablet for use with ZBrush. These settings are designed for the *Intro to 3D Character Design Using ZBrush* class and may differ in other contexts.

Configuring the ExpressKeys

1. After connecting the Wacom tablet to the computer using the included USB cable, locate the *System Preferences* shortcut in the Dock of the computer and click it once to launch System Preferences.

2. Select *Wacom Tablet* from the bottom of the System Preferences window.
