NYU Festivals Delivery Specifications

Last Modified on 11/26/2025 5:47 am EST

This document outlines the delivery requirements to have your film screened in an NYU Festival such as First Run.

Export Options

It is *essential* that you export your film in accordance with the following specifications. If you do not submit an export that meets the following requirements, *your film may not be screened in the festival*.

Audiovisual File

If you do not have a DCP of your film, you may upload a high-quality audiovisual file that satisfies the following criteria:

File Name

The file name must contain the film title, followed by the director's first and last name. Separate each with an underscore to create the following structure:

Title_FirstName_LastName (e.g. EverythingEverywhereAllAtOnce_The_Daniels.mov)

The file name may only contain letters (English alphabet only), numbers, and underscores.

Resolution

Any of the following resolutions are acceptable:

- 1920x1080
- 2048x1080
- 3840x2160
- 4096x2160

If your film is not natively in one of these formats, you must export it with the necessary pillarboxing or letterboxing baked-in.

Frame Rate

Either of the following frame rates are acceptable:

- 23.976
- 24.00

Codec and Wrapper

Any combination of the following codecs and wrappers are acceptable:

- Acceptable codecs
 - o H.264
 - o H.265
 - ProRes (recommended)
 - o DNxHR (recommended)
- Acceptable wrappers
 - o .MOV
 - .MXF (Op1A only, no Op-Atom)

Audio

The required audio settings are:

- Audio Channel Format: Stereo (Left, Right)
- 48 kHz and 24 bit-depth are recommended, though 44.1 kHz sample rate and 16 bit-depth will be accepted.

Digital Cinema Packages (DCPs)

If you already have a DCP of your film, you may submit that for screening in an NYU Festival. Any correctly authored, DCI-compliant DCP will be accepted.
