## Using Shutter Encoder

This guide describes the process within Shutter Encoder for converting video or audio clips to a new frame rate. It also covers re-encoding footage into other formats, such as transcoding camera MXFs to ProRes.

### Loading Files

1. Launch *Shutter Encoder* from the *Misc Apps* folder in the Dock.
2. Click the *Browse...* button.

3. Select the video file you'd like to convert in your hard drive.
